

Dawn Norman

Strategic Consultant

T: 202-861-1822

ContactUs@ebgadvisors.com

With an extensive background in the medical device and biologics industry, Dawn Norman leverages her expertise to develop custom client solutions, go-to strategies for clinical studies and evaluations, and a risk-based approach related to regulatory submissions and quality systems.

Bringing more than 20 years of experience in the medical device industry, Dawn has worked with venture capital-backed start-ups, Fortune 100 device manufacturers, and other larger companies alike. Her work is focused on regulatory strategy and submissions, along with clinical study design and execution, for class I, II, and III products, including magnetic navigation devices for neurosurgical, neurovascular, and cardiac indications; high-intensity ultrasound for cardiac ablation; recombinant proteins and growth factors for bone fusion, spine, and orthopedic trauma; vascular access; and various imaging technologies.
